Attention of Mr. F. D. Schunk.

Dear Sir:

I have given your recent letter, in which you ask if I can visit your Club again this year, careful consideration and feel it necessary to respectfully decline your request at this time as my field of endeavor is not primarily in radio but with the rare metals and as there has been nothing fundamentally new developed since I spoke at one of your meetings it would perhaps be more or less of a repetition.

However, I thank you very much for your kind invitation and if in the future something develops which I believe would be of interest to the members of the Radio Club I will be glad to reconsider my decision.

Very truly yours,
